EN

IMPORTANT INFORMATION: We will not exchange or pay for damages caused by weather and climate conditions.

Our greenhouse has better wind resistance, which is due to the extra buried tarpaulin, but it does not mean that the greenhouse withstands medium and strong winds. It is therefore strongly recommended to remove the cover under wind. Otherwise, it is also advisable to bury the metal structure in the ground or reinforce the ground support.

FR

INFO IMPORTANTE : Nous n'échangerons pas ou ne rembourserons pas les dommages causés par les conditions météorologiques et climatiques.

Notre serre a une meilleure résistance au vent grâce au surplus de bâche à enterrer, mais ne signifie pas que la serre résiste à des vents moyens et forts. Il est donc vivement recommandé de retirer la bâche en cas de vents. Sinon il est également conseillé d'enterrer la structure métallique au sol ou renforcer le maintien au sol.

ES

INFORMACIÓN IMPORTANTE: No cambiaremos ni pagaremos por daños causados por el tiempo y las condiciones climáticas.

Nuestro invernadero tiene una mejor resistencia al viento, que se debe a la lona extra enterrada, pero no significa que el invernadero resista vientos medios y fuertes. Por ello, se recomienda encarecidamente retirar la cubierta en caso de viento. En caso contrario, también es aconsejable enterrar la estructura metálica en el suelo o reforzar el soporte del suelo.

PT

INFORMAÇÕES IMPORTANTES: Não trocaremos nem pagaremos por danos causados pelas condições meteorológicas e climáticas.

A nossa estufa tem melhor resistência ao vento, o que se deve à lona extra enterrada, mas isso não significa que a estufa resista a ventos médios e fortes. Por conseguinte, é fortemente recomendado remover a cobertura sob o vento. Caso contrário, é também aconselhável enterrar a estrutura metálica no solo ou reforçar o suporte do solo.

DE

WICHTIGER HINWEIS: Schäden, die durch Wetter- und Klimabedingungen verursacht werden, werden von uns weder ersetzt noch vergütet.

Unser Gewächshaus hat eine bessere Windbeständigkeit wenn die überschüssige Plane in den Boden eingegraben wird. Dies bedeutet jedoch nicht, dass das Gewächshaus mäßigen und starken Winden standhält. Es wird daher dringend empfohlen, die Abdeckung bei Wind zu entfernen. Ansonsten ist es auch ratsam die Metallstruktur in den Boden zu versenken oder die Bodenbefestigung zu verstärken.

IT

INFORMAZIONI IMPORTANTI: Non cambieremo il prodotto né pagheremo i danni causati dalle condizioni climatiche e meteorologiche.

La nostra serra dispone di una migliore resistenza al vento grazie all'eccesso di teloni da interrare, ma non significa che la serra resista a venti moderati e forti. Quindi si consiglia vivamente di rimuovere la copertura in caso di vento. Altrimenti, è consigliabile interrare la struttura metallica nel terreno o rinforzare il supporto a terra.
