- Entering the product, clothing with long cords should not be worn while playing on this product.

## **SET UP**

This product must be set up and supervised by an adult. Use only on grass or soft surfaces. Do not use on concrete, rough surfaces etc. Always make sure the ground is debris-free before setup, and never drag across rough surfaces. Before assembling make sure to place the product on a soft level surface at least 2 meters away from any obstruction, such as garage, fences, over hanging branches, cloth line or electrical wires. Roll product, Connect blower(s) to inlet, and tie. Anchor the blower to the ground using the stakes provided. Do not use the blower near water or in wet conditions. If the blower becomes wet, discontinue use until it is dry. Plug in and start the blower; your unit will inflate within a couple minutes. Leave the blower running the entire time the inflatable is being used. You will hear air “breathing” out of seams and fabric. This is intentional to allow air to escape. Once inflated, anchor the inflatable product to the ground using the stakes provided. Never use the inflatable without anchoring it to the ground.

**If the product is water slide, please follow the instruction below.**

- Children can drown in very small amounts of water; ADULT SUPERVISION is required at all times.
- Change the water of pool frequently particularly in hot weather, or when noticeably contaminated.

**Warning! Never leave your child unattended drowning hazard.**

### **Disassemble Instructions**

Ensure that all the players have left play area. Remove any loose articles or debris from play area. Empty any water from water units while still inflated. Allow the unit to continue to run until thoroughly dry. Turn off, and unplug blower. Once product is fully deflated, fold & store in cool, dry area.

### **Maintenance & Repair**

Always keep products clean to protect the seams and surface. Regularly inspect seams and play surface for any necessary repairs. Slight damage caused by nature or man-made factors can be repaired with the repair kit provided. To repair, deflate the product thoroughly, and ensure surface is dry. Cut patches to sizes suitable for repair. Apply glue on both the repair patches, and the damaged surface. For larger punctures and rips, the unit can be repaired using the included patch and strong thread.

### **Care**

In order to get the maximum life out of your inflatable water slide or jumping castle, follow these simple care instructions.

- Make sure the product is free from any objects before packing it
- If the product is a water park, please drain all water from it,

- Allow the water park to run empty, in order for the blower to dry all water from inside materials.
- Never leave your jumping castle outside. Weather will corrode materials.
- Never drag the inflatable across concrete, sharp objects, etc.

### **Maintenance**

- Checks and maintenance of the all parts of this product should be carried out of regular intervals.
- If these checks are not carried out this product could overturn or become a hazard. Whenever practical, the instructions shall also be affixed to the product.
- The inspection and maintenance should be conducted for any damage or leaking of the product.
- If there is a puncture on the surface you can repair with the provided repair kit.
- The Product can be cleaned using mild detergent, please make sure to keep water away from blower at all times.
- Do not store product when wet. Store product in dry conditions when not in use.
