## Required tools:

Tools				
	Gloves	Safety Glasses	Table	Ladder
				
	Power drill	Screw drive	Pencil	Tape Measure

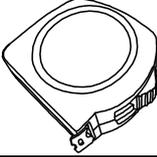

## Tips:

1. Clear a working area to allow access on 4 sides. A raised work surface will make assembly easier, it is easier to install the wall panel on the table.
2. All parts are identified so when working through the instructions page by page the diagrams show where each part is positioned.
3. Most pre-punched holes need to be fixed with self-tapping screws, and a few holes need to use self-drilling screws.
4. Before starting, to avoid any accidental injury, we recommend the use of gloves to protect your hands, safety glasses to protect your eyes and shoes or boots to protect your feet.
5. Please keep children away from your construction site.
6. Most assembly can be completed by one person, assistance may be needed when you reach the erection stage.
7. Please note: Some local government authorities have rules & regulations on shed installation and you may need approval to erect this shed.

## Steps:

1. Unpack all components from the carton and lay outside your work area and check parts against the part list.
2. Work through assembly instructions page by page.
3. When assembly completed, place the shed in position and fix anchor to the ground.
4. Clean up all metal pieces and screws.

Outils nécessaires :

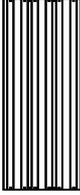

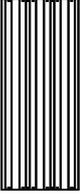

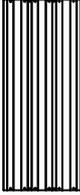

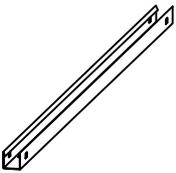

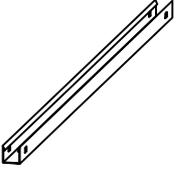

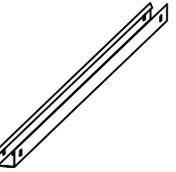

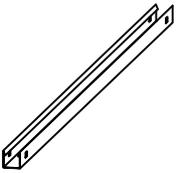

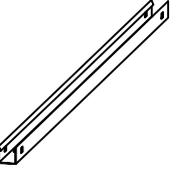

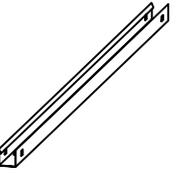

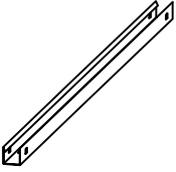

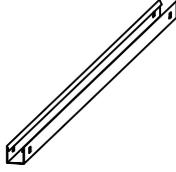

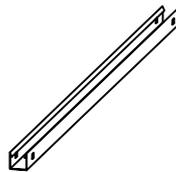

Outils				
	Gants	Verres de sécurité	Tableau	Échelle
				
	Perceuse électrique	Entraînement par vis	Crayon	Ruban à mesurer

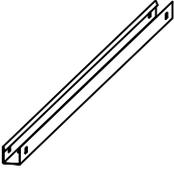

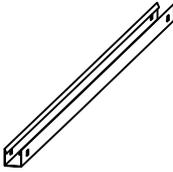

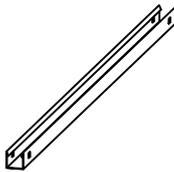

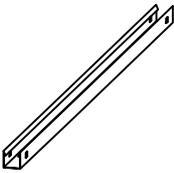

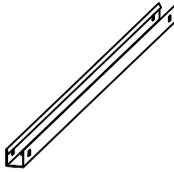

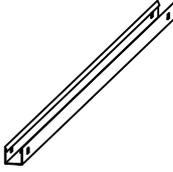

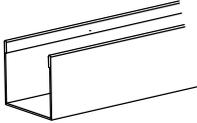

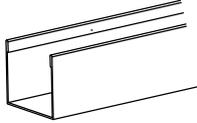

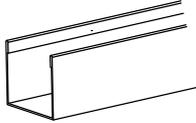

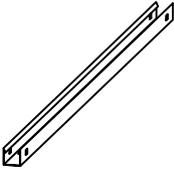

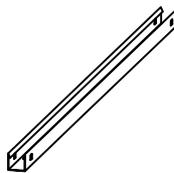

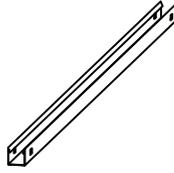

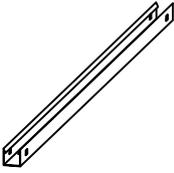

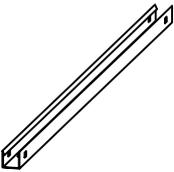

Conseils :

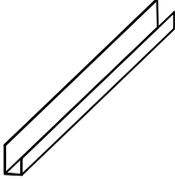

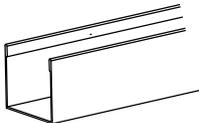

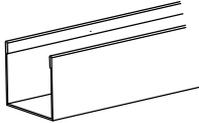

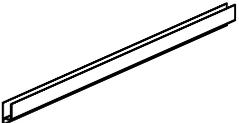

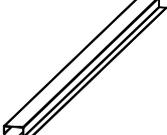

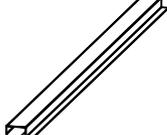

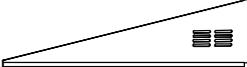

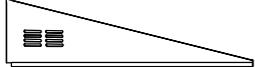

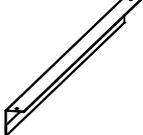

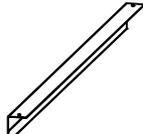

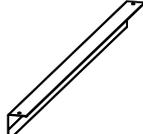

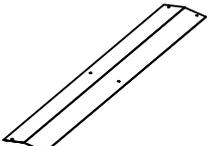

- dégagez un espace de travail pour permettre l'accès sur les 4 côtés. Une surface de travail surélevée facilitera l'assemblage. Il est plus facile d'installer le panneau mural sur la table.
- toutes les pièces sont identifiées, de sorte que lorsque vous lisez les instructions page par page, les diagrammes indiquent la position de chaque pièce.
- la plupart des trous pré-perforés doivent être fixés à l'aide de vis autotaraudeuses, et quelques trous doivent être fixés à l'aide de vis autoperceuses.
- Avant de commencer, pour éviter toute blessure accidentelle, nous vous recommandons de porter des gants pour protéger vos mains, des lunettes de sécurité pour protéger vos yeux et des chaussures ou des bottes pour protéger vos pieds.
- Veillez tenir les enfants à l'écart de votre chantier de construction.
- la plupart des opérations d'assemblage peuvent être réalisées par une seule personne, mais une assistance peut être nécessaire lorsque vous atteignez le stade de l'érection.
- Veillez noter que certaines autorités locales ont des règles et des réglementations concernant l'installation des cabanons et qu'il se peut que vous ayez besoin d'une autorisation pour ériger ce cabanon.

Étapes :

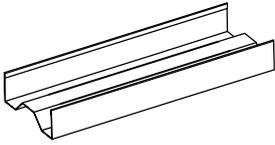

- déballer tous les composants du carton et placez-les à l'extérieur de votre zone de travail, puis vérifiez les pièces par rapport à la liste des pièces.
- lisez les instructions d'assemblage page par page.
- une fois l'assemblage terminé, placez l'abri en position et fixez l'ancrage au sol.
- nettoyez toutes les pièces métalliques et les vis.

## STEP1

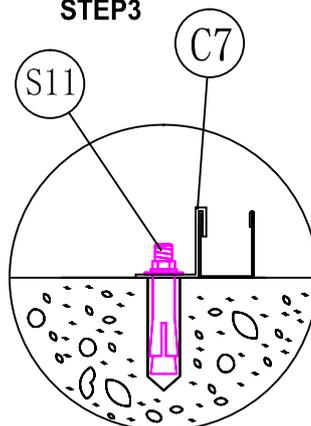

- EN\_1.** The shed is now free standing. It is critical at this stage to ensure the shed is levelled.  
 2. Then measure the diagonal distance and make sure the four side walls are squared to 90 degrees.  
 3. Use anchor kit (C7 & S11) when fixing to a concrete base. Fastening the anchor kit onto a concrete pad  
 3.1 Mark the place of the anchor on the ground.  
 3.2 Use 10mm -0.39" concrete drill bit and drill holes 60mm-2.4" deep.  
 3.3 Tap concrete fixing bolts into the hole, place anchor, add washer and nut and fasten.

- FR\_1.** l'abri est maintenant libre. Il est essentiel à ce stade de s'assurer que l'abri est de niveau.  
 2) Mesurez ensuite la distance diagonale et assurez-vous que les quatre murs latéraux sont équarris à 90 degrés.  
 3. utilisez le kit d'ancrage (C7 et S11) pour la fixation sur une base en béton. Fixation du kit d'ancrage sur un socle en béton  
 3.1 Marquez l'emplacement de l'ancrage sur le sol.  
 3.2 Utilisez une mèche à béton de 10 mm et percez des trous de 60 mm de profondeur.  
 3.3 Tapez les boulons de fixation pour béton dans le trou, placez l'ancrage, ajoutez la rondelle et l'écrou et fixez.
