

# INSTRUCTIONS

## OPEN STEP

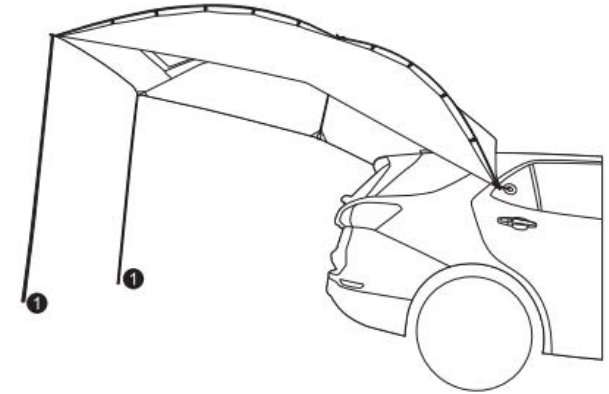

1. Thread the pole 3 into a piece, then unfold the external tent, and install the pole as shown in the figure.

2. Thread the pole 2 into two long poles, and then turn the tent around. Put the two long poles on the top as shown in the figure, and install both ends as shown in the figure. Then tie the knot in the middle

3. Clean the windows to be fixed with paper, and then lift the tent. Fix the sucker on the window, put the hall stay through, and fix it with the ground nail and wind-proof rope as shown in the figure.

Product: Car tent

Accessories:

Outer bag, tent, auxiliary pole, hall pole, ground nail and wind-proof rope
