This clamp maybe not suitable for motorcycle,very large cars or vehicles.

Contents

Wheel Clamp Body

Yellow wheel disc

Silver Hook

Set of 2 keys

Instruction for use

To avoid risk of damage ,remove wheel trims from the vehicle before fitting the Wheel clamp.

Take care when fitting to vehicles with alloy wheels so as to avoid damage to the delicate surface.

The clamp comes in three sections. To fit follow these simples instructions.

1. Insert the keys into the lock and turn till the lock pops up. Remove the key.
2. Place the main body section on the ground with the plate at the front.
3. Slide the clamps legs behind the wheel.
4. Bring the unit forwards so that the hooks pass onto the tyre.

5. Take the yellow disc on place behind the clamp body with the two square sections facing either side of the lock.
6. Take the silver hook with the holes facing out and pass this through the first square section, then through the lock mechanism and finally through the last square section.

7. When the silver hook has passed over the tyre tread and is lined up in the lock mechanism press the lock in till it clicks

8. Now push the black rubber cover over the lock to prevent dirt entering the lock.
9. To remove lift rubber cover to key slot, insert key and turn till the lock pops out.
10. Pull the silver hook through the square sections and remove.
11. Remove yellow disc and take off the clamp from the wheel.
12. Store until needed again.

CAUTION

DO NOT attempt to drive when the clamp is fitted.

The manufacturer can not accept any responsibility for damage of any kind caused by the improper fitting or use of this product. If in doubt seek the advice of a professional mechanic.
