

# JAGUAR F-TYPE SVR CONVERTIBLE

- Children electric car
- Installation and Operation Instructions
- Stimulation car model
- System driven by remote control
- Forward, backward and steering operations by remote control
- Forward and backward operations by manual shift
- Steering wheel's music function
- Techniques of volume regulation and MP3's amplification function
- Battery power display

## Parts List:(Name and Quantity)

## Product Specifications:

|                        |  |
|------------------------|--|
| Name                   | Parameters   |
| Battery                | 6V7AH/12V7AH/12V10AH   |
| Generator              | Drive Generator 12V540 (12000RPM)<br>Turn Generator 12V380 (5000RPM)<br>Swing Generator 12V540 (6000RPM) |
| Applicable Age Range   | Babies of 37-95 months   |
| Peak Mass              | No more than 30 kilograms  |
| Physical Dimension     | 126.5x72.5x52.5CM  |
| Speed                  | 3-5 kilometers per hour  |
| Hours of Use           | Using 1-2 hours after Charging 8- hours  |
| Charging               | Input: 220V-240V Output: 12V1000MA   |
| Remote Control Battery | AAA1.5V  |

## Function

|                        |           |  |
|------------------------|-----------|--|
| Indicator:             |           |  |
| ① Multi-Media          | ⑦ Speed   |  |
| ② Residual electricity | ⑧ USB     |  |
| ③ Simulation dashboard | ⑨ TF      |  |
| ④ Motion swaying       | ⑩ MP3     |  |
| ⑤ Start                | ⑪ Forward |  |
| ⑥ Light                | Stop      |  |
|                        | Back      |  |

## Remote Control Function and Instructions

- Never switch forward and backward operations in the moving, or the gear box and motor will be damaged
- Use the remote control with battery
- Only the baby's legal guardian can use the remote control.
- The product is operated mainly by remote control

### Code Method:

Press UP&DOWN Buttons to see that the indicator light is constant on, and turn on the power.

## Battery Operating Specifications:

- Never mix new and old batteries, or different kinds of batteries.
- Never mistake positive and negative electrode of battery, or short circuit will happen.
- Never use non-rechargeable batteries.
- Install batteries in a right polarity.
- Only adults can recharge or change batteries.
- Never make power port's short circuit happen.
- Recharge the battery only when it is taken out of the toy car.
- Take exhausted battery out of the toy car and keep it out of Children's reach.
- Remove battery screws with a screwdriver, open battery cap as the arrow signals, and in the 2.4G remote control model install two AAA 1.5V batteries in a right polarity.

## Installation Order Diagram

### 1. Installation of tires

Stick the wheel cover LOGO sticker on the wheel cover to distinguish the front and rear wheels. successively Fix gaskets, front wheels, gaskets, and use the cotter pins. The rear wheel, gasket, and the wheel cover are fixed in turn. Clip in the rear wheel bayonet and install the front and rear wheels on the other side in the same way.

### 2. Installation of dashboard

First, connect the dashboard to the interface of the big body, and put the dashboard into the instrument panel. Connect the steering wheel wiring handle, and turn the steering wheel into the direction control rod, and screw the steering wheel. The hole position is fixed by the nut.

### 3. Installation of windshield

The windshield is aligned with the card port on the body.

### 4. Connection power

Connect the wiring of the battery, connect the red connection, Turn on the power and check if the circuit is normal.

### 5. Install the tail wing

Aim the bracket and tail to the location of the bayonet on the body, and force it into it.

### 6. Install the seat

Take the screws off the seat, Then the seat is aimed at the body, Screw it with a screw.

### 7. Installation of reflector

Turn the reflector into the screw hole on the body, pay attention to distinguish between left and right. The screw is fixed.

## Warnings

Only adults can install parts and adjust the car, and keep moving parts out of children's reach. Children under 36 months cannot use the toy car as it has many small parts. Children must take the seat belt when using the car, and keep the car out of the fire. Children can use the product only in the company of adults, and the adult cannot leave during the process. Never let Children stand or play onto the pedal or in the car. Only adults can complete storage battery charging, and must charge the product before its first use. Keep such package materials as plastic bags out of children, or they will suffocate or kill children. Never use parts provided by non-manufacturers. Never let children play with the charger. Never use the product with over 30-kilogram load. The product's applicable age range is 37- 95 months. The number of connected power by the product can never be over the recommended number.

### Notice of use:

Never use the product in such dangerous zones as street, road, slope or drain. Never change the circuit and additional electric devices. Never use remote control in rainy days or in the water, never pour water or other liquid into the car, keep the product out of the fire, otherwise the car will be damaged. Only one child can use the product, and its weight cannot exceed 30 kilograms.

Turn off the power when not in use and remove battery connector when not using it for a long time.

As the product has battery charger, check whether wire plug shell and other parts are damaged or not, and fix those damaged parts.

The product must be assembled by the adult! Before assembling, screws and pins are dangerous sharp points.

### Charging notice:

Charge storage battery less than 10 hours, or the storage battery will be damaged forever.

In charging, put DC Plug into the power socket, put charger into power plug; never use the product during charging it.

The product can be used for one hour, and the charging time is 8-10 hours, exceeding no more than 18 hours.

It is common for charger and storage battery to have not become heated (temperature under 60 degrees) in charging.

Never use the connector with the water, or short circuit will happen.

Use the product's own charger, or cause charger and storage battery to be damaged or short circuit.

Charge the product when not using it for a long time.

### Charging steps are as follows:

Step 1 : Find the charge hole beneath the car seat'

Step2: Put the charger plug into the plug hole.

Step 3: Connect the charger to the power socket.

Relevant materials: PP plastics, k-carrageenan, generator, storage battery and iron castings.

## Trouble Clearing

| Type   | Analysis                                      | Solutions                              |
|--|---|--|
| The car cannot get started.                                | Low battery voltage ;                         | Charge battery fully;                  |
|  | Protection of electric devices;               | Use the car a few minutes later;       |
|  | Failure to press the switch button correctly; | Use the car according to instructions; |
|  | Falling of power connector;                   | Install the connector again;           |
|  | Battery breakdown;                            | Change battery;                        |
| The battery cannot be charged.                             | Damage of electric devices;                   | Change electric devices;               |
|  | Generator breakdown ;                         | Change generator.                      |
|  | Falling of battery connector;                 | Install the connector again;           |
| The car has a short range.                                 | No charging for the charger;                  | Plug the charger again;                |
|  | Charger breakdown ;                           | Change the charger.                    |
|  | Not full charging of battery ;                | Charge fully the battery again;        |
| There appear slight noise and heat of the car in charging. | Much-used battery ;                           | Change the battery                     |
|  | No electricity for battery ;                  | Charge fully the battery again         |
| The car has a slow speed.                                  | Overload ;                                    | Reduce the load below 30 kilograms     |
|  | Uneven driving surface ;                      | Drive on uneven surface                |
|  | Chemical reactions ;                          | Normal reactions                       |

## Maintenance and Service

Before use children's parents should check whether charge's wiring, plug, shell and other parts are damaged, and fix those damaged parts. After using the product for a time, parents should lubricate iron castings with lube, or those castings will get rusted; they should keep the product out of fire and lay it flat in dark places; they should put the product inside the house or cover it with one water-proof cloth in wet whether.

Parents should keep the product out of such hot objects as stove and heater, or its plastic parts may be thawed; they should keep the product out of combustible objects in charging, or the fire may happen.

Parents should clean car surface with one dry cloth, or clean plastic parts with non-waxy furniture polish; they shouldn't clean plastic parts with chemical solutions or clean the car with water; children cannot drive the car in wet or rainy weather, or the car's generator, circuit system and battery will be damaged.

when not using or laying the product, parents should cut off car power, keeping all the switches into "STOP" or "OFF" model.

Parents mustn't use the fuse which doesn't conform with the agreed specifications.

Parents should't change product structure and circuit system, and should have the product checked and fixed by professionals or under the guidance of professionals.
