Generator

Applicable Age Range

Hours of Use Using 1-2 hours after Charging 8-10hours Input: 220V-240V Output: 12V1000mA/6V500mA Charger

Remote Control Battery AAA1.5V

Function

Indicator:

- ① Multi-Media
- 8 TF interface
- 2 The voltage display
- ③ Dashboard
- 4 Speed selection
- ⑤ Power switch
- 6 Light switch
- (7) USB interface
- 9 MP3 interface
- ① Forward
 Stop
 Back

Remote Control Function and Instructions

- •Never switch forward and backward operations in the moving, or the gear box and motor will be damaged
- •Use the remote control with battery
- •Only the baby's legal guardian can use the remote control.
- •The product is operated mainly by remote control

Code Method:

Press UP&DOWN Buttons to see that the indicator light is constant on, and turn on the power.

Battery Operating Specifications:

Never mix new and old batteries, or different kinds of batteries.

Never mistake positive and negative electrode of battery,

or short circuit will happen.

Non-rechargeable batteries are not to be recharged

Install batteries in a right polarity.

Only adults can recharge or change batteries.

Never make power port's short circuit happen.

Recharge the battery only when it is taken out of the toy car.

Take exhausted battery out of the toy car and keep it out of Children' s reach.

Remove battery screws with a screwdriver, open battery cap as the arrow signals, and in the 2.4G remote control model install two AAA 1.5V batteries in a right polarity.

Installation Order Diagram

1. Installation of tires

To distinguish the front and rear wheels, first insert the gasket into the front axle, press the center key on the front wheel into the front axle, then insert the rear wheel into the rear axle and press the center.

2. Installation of dashboard

First, connect the dashboard to the interface of the big body, and put the dashboard into the instrument panel. Connect the steering wheel wiring handle, and turn the steering wheel into the direction control rod, and screw the steering wheel.

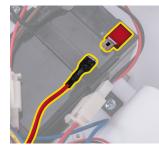

3. Installation of windshield

The windshield is aligned with the card port on the body.

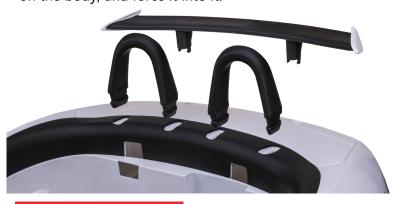

4. Connection power

Connect the wiring of the battery, connect the red connection. Turn on the power and check if the circuit is normal.

5. Install the tail wing

Aim the bracket and tail to the location of the bayonet on the body, and force it into it.

6. Install the seat

Take the screws off the seat, Then the seat is aimed at the body, Screw it with a screw.

7. Installation of reflector

Turn the reflector into the screw hole on the body, pay attention to distinguish between left and right.

Warnings

Only adults can install parts and adjust the car, and keep moving parts

Children under 36 months cannot use the toy car as it has many small parts. Children must take the seat belt when using the car, and keep the car out of the fire.

Children can use the product only in the company of adults, and the adult cannot leave during the process.

Never let Children stand or play onto the pedal or in the car.

Only adults can complete storage battery charging, and must charge the product before its first use.

Keep such package materials as plastic bags out of children, or they will suffocate or kill children.

Never use parts provided by non-manufacturers.

Never let children play with the charger.

Never use the product with over 25-kilogram load.

The product's applicable age range is 37-95 months.

The number of connected power by the product can never be over the recommended number.

Notice of use:

Never use the product in such dangerous zones as street, road, slope or drain.

Never change the circuit and additional electric devices.

Never use remote control in rainy days or in the water, never pour water or other liquid into the car, keep the product out of the fire, otherwise the car will be damaged.

Only one child can use the product, and its weight cannot exceed 25

Turn off the power when not in use and remove battery connector when not using it for a long time.

As the product has battery charger, check whether wire plug shell and other parts are damaged or not, and fix those damaged parts.

The product must be assembled by the adult! Before assembling, screws and pins are dangerous sharp points.

Charging notice:

Charge storage battery less than 10 hours, or the storage battery will be damaged forever.

In charging, put DC Plug into the power socket, put charger into power plug;never use the product during charging it.

The product can be used for one hour, and the charging time is 8-10 hours, exceeding no more than 18 hours. It is common for charger and storage battery to have not become heated

(temperature under 60 degrees)in charging.

Never use the connector with the water, or short circuit will happen. Use the product's own charger, or cause charger and storage battery to be damaged or short circuit.

Charge the product when not using it for a long time.

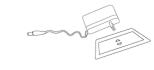

Charging steps are as follows:

Step 1: Find the charge hole beneath the car seat'

Step2: Put the charger plug into the plug hole.

Step 3: Connect the charger to the power socket.

Relevant materials: PP plastics, k-carrageenan, generator, storage battery and iron castings.
